Mining exploration reports on mining tenements (MRT) process
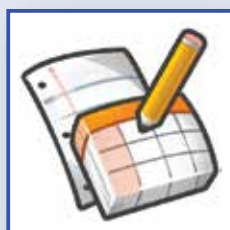

Licensee downloads the MRT software from the Departmental website onto their PC

Licensee enters raw exploration data into spreadsheets (or tab-delimited data files)

Licensee uses the MRT Software to
- **record information (metadata) about the exploration project and about their data**
- **generate tab-delimited data files in the format expected by the Department**
- **generate a list of ALL the files that go to make up the report**

Licensee sends the report files, the generated tab-delimited data files and the list of files to the Department
