Compliance Activities Quarterly Summary

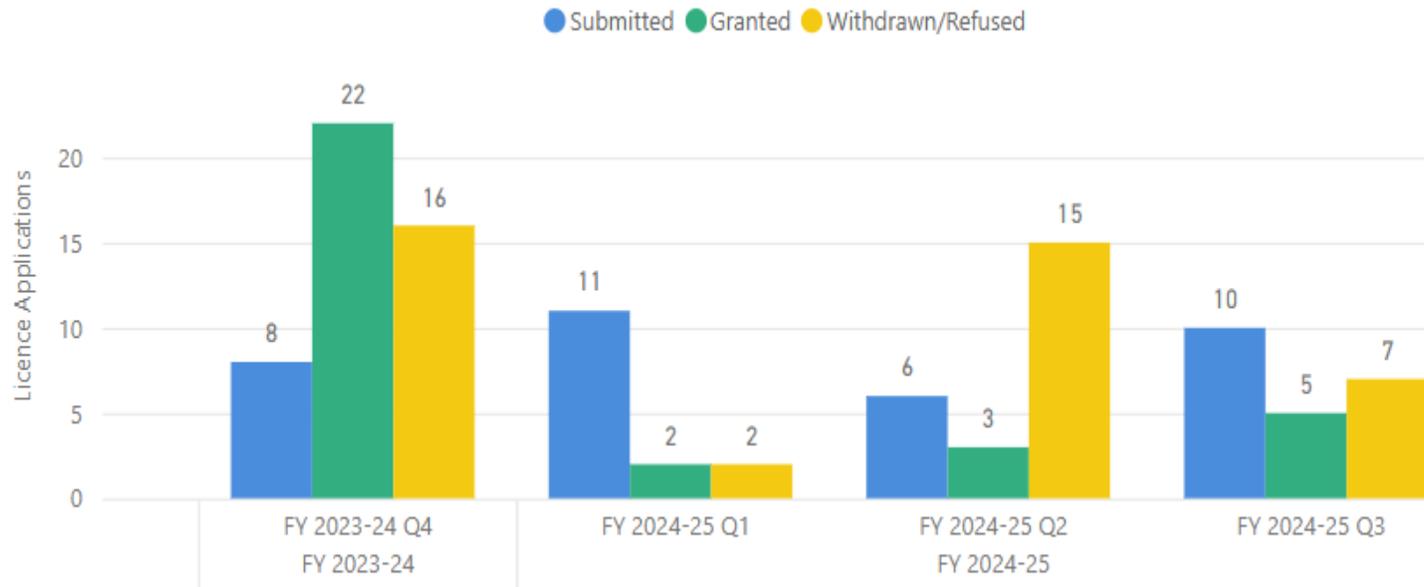

Key points to note

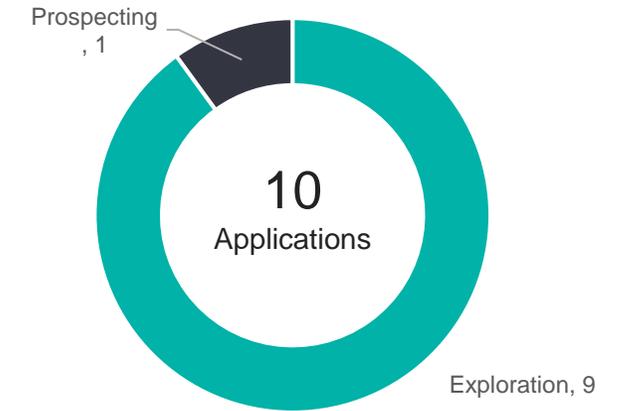

- **The Compliance team have inspected more sites** (across mines and quarries) in the last quarter than any quarter for at least the last 8 years. This is primarily due to the introduction of a new type of inspection.
- Several themes are emerging from the rapid risk inspections: excess **derelict equipment**, poor management of **hydrocarbons**, failure to complete **progressive rehabilitation** and failure to have **a copy of the approved work plan on site**.
- More information on the rapid risk inspections will be available in Q4.
- Audit program for Declared Mines this quarter focused on compliance and stability.
- **Compliance with the actions specified in s110 notices**, and completion by the required date is an increasing focus. In this quarter a work authority holder was issued an official warning for failure to complete a required action by the due date.
